1.

The image displays two screenshots of the AWS Management Console. The top screenshot shows the 'Instances (1/1)' page, where a single EC2 instance is listed with the ID 'i-09e0e04e169b377e', status 'Running', and type 't2.micro'. Below the table, the 'Instances i-09e0e04e169b377e (EC2 Instance)' details are shown, including the public IP address '3.95.34.55' and the public IP address '172.31.94.55'. The bottom screenshot shows the 'Launch an Instance' wizard, which allows users to create a new EC2 instance. The wizard includes sections for 'Name and tags', 'Application and OS Images (Amazon Machine Image)', and 'Summary'. The 'Summary' section shows the number of instances (1), the software image (Amazon Linux 2023 AMI), the virtual server type (t2.micro), the firewall (New security group), and the storage (1 volume(s) - 8 GiB). The 'Launch Instance' button is highlighted in orange.

**Instances (1/1) Info**

Name	Instance ID	Instance state	Instance type	Status check	Alarm status	Availability Zone	Public IPv4 DNS
EC2 Instance	i-09e0e04e169b377e	Running	t2.micro	—	No alarms	us-east-1b	ec2-3-95-34-55.c

**Launch an Instance Info**

Amazon EC2 allows you to create virtual machines, or instances, that run on the AWS Cloud. Quickly get started by following the simple steps below.

**Name and tags Info**

Name: EC2 Instance [Add additional tags](#)

**Application and OS Images (Amazon Machine Image) Info**

An AMI is a template that contains the software configuration (operating system, application server, and applications) required to launch your instance. Search or Browse for AMIs if you don't see what you are looking for below.
